

US 63 Environmental Assessment

Eau Claire Transportation District
April 2002
Volume 1, Number 1

In this issue

- US 63 Project background
- Alternatives Workshop to be held

Project schedule

- May 23 – Alternatives Workshop
- Summer 2002 – Alternatives development and analysis
- Fall 2002 – Alternative selection and impacts
- Winter 2002/2003 – Environmental Assessment Report

Planning for our future

Continued growth makes it imperative to begin long-range planning for the US 63 corridor in the Baldwin area.

WisDOT will be working with Strand Associates to study US 63 from the I-94 interchange north to WIS 64.

The US 63 study runs north through the village of Baldwin. The planning process will produce an Environmental Assessment that develops and evaluates long-term improvement plans for US 63 in and around Baldwin. The improvements recommended from this study most likely will be constructed after the year 2015. The goal of the study is to develop a transportation system plan that compliments planned land uses and maintains the mobility of the US 63 corridor well into the future.

Alternatives Workshop to be held in Baldwin

The US 63 study will host an Alternatives Workshop on May 23, 2002, from 7:30 to 9:30 p.m. at the American Legion Post 240 in Baldwin to give local residents and officials an opportunity to state what they think are the primary transportation needs and then help develop solutions. The Alternatives Workshop will bring together state, county, town, and village officials with area residents.

The workshop will begin with a brief summary of the project, followed by a question and answer session. Participants will then divide into groups of six to eight and will develop possible solutions to the anticipated traffic problems.

Solutions generated at this workshop will form a foundation for alternatives that are analyzed in the Environmental Assessment.

Coffee, snacks, and other refreshments will be provided for all workshop participants.
